This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

FP Foresight Sustainable Future Themes Fund, a sub-fund of FP Foresight OEIC

Class B Accumulation Shares (GBP) (ISIN GB00BMYRR983)

Class B Income Shares (GBP) (ISIN GB00BMYRRB05)

The Fund is managed by FundRock Partners Limited.

Objective and investment policy

Objective:

The objective of the Fund is to achieve capital growth (the increase in the value of investments) over a five-year period by investing in companies that provide a positive environmental and/or social benefit through both the environmental and social impact of their business operations (their 'footprint') and the scope of their products or services to actively decarbonise an economic sector or provide a positive social outcome (their 'handprint'). For these purposes, positive environmental and social benefits are defined through alignment with one or more of the Fund's pre-defined 'Sustainable Investment Pillars': 'Sustainable Energy', 'Sustainable Food, Land, and Forestry', 'Waste, Water, and the Circular Economy', 'Health and Education', and 'Digital World'.

Policy:

The business activities of the companies that the Fund invests in will align with one or more of the following themes:

- 1. Sustainable Energy; 2. Sustainable Food, Land and Forestry; 3. Waste, Water and the Circular Economy; 4. Health and Education and 5. Digital World.
- These themes have been identified as the Fund's 'Sustainable Investment Pillars' against which each prospective security's revenues will be assessed. Please read the section titled 'Key Performance Indicators' for more information.
- The Fund will have a concentrated portfolio and will only hold between 25 and 45 holdings. The Fund may invest in the shares of companies of all sizes anywhere in the world (with a maximum 20% in emerging markets) that align with the Fund's investment and sustainability objective.
- At all times, at least 70% of the total Fund's assets will be invested in accordance with its sustainability objective. All securities will be selected in accordance with the sustainability objective; however, the Fund may hold up to 10% in cash or money market instruments. This cash or money market holding will be to maintain liquidity, manage risk, and ensure flexibility for meeting redemptions or seizing new investment opportunities. Cash and money market investments will not be made in pursuit of the sustainability objective; however, they will also not be in conflict with the sustainability objective.
- The Fund may also use derivatives (which are investments whose value is linked to another investment, or the performance of a stock exchange or to some other variable factor, such as interest rates) for the purposes of hedging and/or efficient portfolio management. Efficient portfolio management is where the Fund is managed in a way to reduce risk or cost and/or generate extra income. These investments would not be made in pursuit of the sustainability objective; however, they would also not be in conflict with the sustainability objective. The Fund's use of derivatives is expected to be limited.
- The Fund will not invest in securities that derive more than 10% of their revenues from; the extraction or production of shale gas or oil sands, the extraction, refinement, or energy generation of thermal coal or oil, the extraction or refinement of natural gas or animal testing for purposes other than regulated healthcare.
- The Fund's investment universe and sustainability objective mean that in practical terms the Investment Manager expects to invest in companies which have negligible revenue exposure to these areas. Further detailed information on exclusions including

definitions of sectors and activities can be found on the Investment Manager's website at: <https://www.foresight.group/>.

- The Investment Manager assesses all securities against the Foresight Capital Management Sustainable Investment Standard ("the Standard"). Only securities which meet the Standard will be considered for investment in the Fund. The Investment Manager has determined that alignment with the robust Standard set out in the Prospectus will ensure securities consistently deliver in line with the Fund's sustainability objective.
- The asset selection process for securities combines proprietary research with external reporting to assess if a company meets the Fund's sustainability criteria. Ongoing review involves three key practices: a 'material item watchlist' to monitor considerations raised during the pre-investment process, 'regular reviews' using both internal and public reports for continued oversight, and 'engagement' to ensure transparency and influence strategy. Further details on the sustainable investment process can be found in the 'Sustainable Investment Process' section of the Prospectus.
- The Fund is actively managed.

Benchmark:

The Fund performance can be compared to the performance of the FTSE All World GBP index. It is therefore a comparator benchmark against which the performance of the Fund can be compared (the "Comparator Benchmark"). The Comparator Benchmark was chosen by the Investment Manager because it is a widely-used indicator of the performance of the global stock-markets, in which the Fund invests. Management of the Fund is not restricted by this benchmark. The deviation from the Comparator Benchmark may be significant and the portfolio of the Fund may at times bear little or no resemblance to the Comparator Benchmark.

Other information:

- You can buy and sell shares between 9am and 5pm on most business days when the London Stock Exchange is open for a full range of services.
- The Fund's base currency is Pounds Sterling.
- We carry out investors' requests, to buy, sell or switch, at midday on each business day (which excludes UK public holidays). If we receive a request after midday, we deal with it on the next business day.
- If you hold accumulation shares, income from investments in the Fund will be rolled up into the value of your shares.
- If you hold income shares, income from your investment is paid out to you four times a year.
- Recommendation: the Fund may not be appropriate for investors who plan to withdraw their money within 5 years.
- There can be no guarantee that the objective of the Fund will be achieved.
- On encashment, particularly in the short-term, you may receive less than the original amount invested.
- Charges applicable to the Fund accrue daily, therefore an equivalent rise in the value of shares is required before the original investment can be recovered.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- The Fund appears as a '6' on the scale. This is because it invests in the infrastructure industry and the Fund's simulated and/or realised return has experienced high rises and falls historically.
- The risk indicator is not related to the risk scale number of the Fund. The indicator does not take into account the following risks of investing in the Fund:
- The Fund relies on other parties to fulfil certain services, investments or transactions. If these parties become insolvent and fail to meet their obligations, it may expose the Fund to financial loss.
- Environmental, Social and Governance Risk (ESG): A portfolio that excludes companies deemed unattractive in their ESG characteristics might underperform a portfolio that is run without regard to ESG characteristics. Data constraint is a big challenge and there are limitations on the types of sustainability and ESG-related data currently provided to the market. Disclosures and ESG-related information are subject to change due to ongoing improvements in such data.

- The Fund could be exposed to 'sustainability risk' if an environmental, social or governance event, practice or condition occurs that could cause an actual or a potential financially material negative impact on the value of the investment.
- Derivatives can carry a high degree of risk - a relatively small movement in the price of the underlying security may result in a disproportionately large movement, unfavourable or favourable, in the price of the derivative. Please do not invest if you do not have the level of knowledge required in order to assess and evaluate the risks associated with the use of derivatives by the Fund or the impact of derivatives on your investment.
- Exchange Rate Risk - Fluctuations in exchange rates may cause the value of your investment to rise or fall.
- Management Risk - Investment management techniques that have worked in normal market conditions could prove ineffective or detrimental at other times.
- Liquidity Risk - Certain securities could become hard to value, sell at a desired time and price, or cease to trade altogether.
- The investments of the Fund are subject to normal market fluctuations and other risk inherent in investing in securities. Appreciation in the value of investments is not guaranteed.
- The Fund concentrates its investments in a limited number of securities thus has the potential to generate attractive returns. Over time it may increase the volatility of such Funds' investment performance as compared to funds that invest in a larger number of securities. If the securities in which such Funds invest perform poorly, the Funds could incur greater losses than if it had invested in a larger number of securities.

For full details of the Fund's risks please see Section 5 of the Fund's Prospectus, which is available at www.FundRock.com. Alternatively, you can obtain a copy by contacting the Fund's Administrator at FundRock Partners Limited - FP Foresight, PO Box 12766, Chelmsford, CM99 2FG or, during normal business hours on 0330 123 3721.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
